

## NOTES ON EDUCATION.

The State Agricultural College at Lansing, Mich., graduated 15 students on the 16th inst.

The system of monthly awards to the students at Boston College is said to be working satisfactorily.

The expenses for the public schools of Baltimore, Md., for the year ending Sept. 30, were \$127,966.32.

A society has been formed in London to promote the extension of Oxford and Cambridge teaching to the metropolis.

An effort to endow the College of California will be made by the Baptists of that state, during the coming year, as a centennial gift.

Leipzig University, Germany, according to state catalogues, has about 150 professors and 3,000 students. Among the latter are 45 students from the United States.

The ninth annual session of the Maine State Educational Association begins in Augusta on the 22d inst., and will continue three days. A number of papers on interesting subjects will be read and discussed.

The Union College Alumni Association of Central New-York held its first meeting in Syracuse last Friday evening. Attorney General Pratt was chosen President of the Association for the coming year.

The system of education at colleges has been condemned by a large majority of the present Senior Class at Wesleyan University. This is the first class to which women were admitted in that college.

The union of white and colored children does not work well in the New Orleans public schools. Some of the white children withdraw recently from one of the schools on account of being compelled to sit near the colored children.

The students at Harvard will certify to their attendance at church hereafter by filing blank certificates and filing them with the registrar, and the old custom of employing marking monitors at the college chapel and at the Cambridge churches will be discontinued.

The Board of Hebrew Ministers of Philadelphia have sent a communication to the Board of Education in that city asking that the use of Dr. Whayland's "Elements of Moral Science" be discontinued in the public schools, on the ground that its teachings are objectionable to Jewish parents.

The teaching of drawing in the Boston public schools is making satisfactory progress. The teachers have shown much zeal in their endeavor to qualify themselves for their work. At the last examination over 300 of them passed successfully in free-hand, model, memory, geometric and perspective drawing, and received their diplomas. A Boston paper hopes that that city will be probably the only city in this country which can make a systematic display in drawing at the Centennial Exposition.

Nearly all the New-England States are making preparations for a display of their educational work at the Centennial Exhibition. The Worcester County Industrial Institute, at Worcester, Mass., has appropriated \$8,000 for the expense of its exhibits, and has applied for 5,000 square feet of space. The Massachusetts Institute of Technology is also taking measures to secure a thorough exhibit of its various departments, and the Boston Natural History School intends, if possible, to make a complete display of the Natural History of New-England.

The catalogue of Trinity College just issued gives the number of students as follows: Seniors, 17, of which 5 are pursuing special courses; Juniors, 21; Sophomores, 23, 3 of whom are studying for the degree of Bachelor of Science, and 4 in special courses; Freshmen, 22, with 2 in special courses, making total of 65 students in the college. The Thulie Prize of \$30 is to be awarded this year to the student of 1870 writing the best essay on "The Prerequisites of Periodicity in the Material World," the essays to be submitted to the President before May 1, 1876.

A convention to take into consideration the educational interests of the colored people of Kansas was held in Lexington, Ky., on the 16th inst. The fund for the education of colored children in that State is wholly inadequate, being only about one-half as much per scholar as that provided for white children. The Convention recommended that the Legislature be petitioned to modify the school law so as to furnish equal and adequate facilities for a colored school education to all children of the State, and if this failed that efforts be made to secure the necessary means from other sources.

## New Publications.
